

## **MIRROR**

Human's eyes are cannot see their face. If human want to see themselves or something that behind us or hard to see because some reasons, human use 'MIRROR'.

Almost mirrors are having four corners, like square or rectangular. However it has variety shape, for example circle, oval, or special shape. Some mirrors are very big, and others can hold in human's hand because they are very small. Special mirrors are not flat, they curved inwards or outwards. However, reflected figures are so weird. It made flat glass that coated thinly back side, usually mercury. Mercury is a kind of metal, and it makes glass become mirror when it coated glass.

If you want to use 'MIRROR', just see through it something that you want. However, you can see just what you see, except other person's thought or your heart in your body.

In house or building, next to the door, usually located mirror on the wall. It has no special purpose, but almost

human look it when they pass by it. Car is machine that human can move easily. By the side of the car, small mirrors attached both side, it helps human who want to see back of the car when he/she drive. Bathroom is a small space that human washes his/her face or body. In every bathroom has mirror, because human always check their body and face after the washed. Clothes are items that protect human's skin, and keep body heat. Cloth shop is place that selling clothes, mirror used when human check clothes how suitable to their body. When human, usually women, want to more attractive, they use cosmetics. Cosmetics are cream, liquid, or powder that lay on human's body or face. Cosmetics case has mirror inside that helps human when put on their face well. If human do not check their face, sometimes their face is unattractive than before.
