

Cellular phone

How to communicate with your friend? In human world, we use cellular phone. Have you ever heard about cellular phone? Nowadays cellular phone is human's necessities of life. These days so many people have cellular phone. It is a type of telephone. (Telephone is the electrical system of communication that people uses to talk directly to someone in a different place.) Its purpose is contact other people easily. (Purpose is thing that you want to achieve) Cellular phone is very easy to carry. (Carry is holding it so that it does not fall the ground.)

Wherever you go, you can take it. It is portable. (portable means easily move or carry something.)

Its shape is various - round, rectangle. (Round is shaped like a ball, circle. Rectangle is a four-sided shape.)

Generally, it is a small rectangle and black or white color. It has a little screen and number plate, so you can push the button. . (Button is small hard objects on the

electrical device.)Then, numbers are showed the screen.

(Screen is flat surface which you can see pictures.) Then, you can push the 'call' button and call your friend and you can hear your friend voices. Then, talk to your friend!

Also, you can send a message to your friend. (The message means that people are trying to talk to their friend.) It is very interesting, isn't it? You can buy it. cellular phone's store which is near our university(University is a place where students are educated.) (Buy means you obtain it by paying money for it.) If you can't find store, I'll go with you.(Store is a place where has many things.)Now, Do you understand what it is cellular phone? I know it is very strange to you.(Strange means you are worried about something.) But if you use it just one time, you feel cellular phone is very comfortable to talk to people.
